DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-16, in the reply filed on 09/08/2006 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the functional recitation that "the panels being of appropriate size and shape to load all of the lapped seams predominately in shearing stress when the storage volume contains a liquid" is indefinite because it is not supported by recitation in the claim of sufficient structure to accomplish the function.

In claim 13, the functional recitation that "each of the panels is appropriately sized and shaped to load all of the lapped seams predominately in shearing stress when the storage volume contains a liquid" is indefinite because it is not supported by recitation in the claim of sufficient structure to accomplish the function.

Claims that have not been specifically mentioned are rejected since they depend from claims rejected under 35 U.S.C. § 112, second paragraph.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 4-7, 12, 13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 4,441,627 to Takeuchi.

As a note, having met the recitation of the panels being bonded by lapped seams and the plurality of rounded corners on four of the panels, the functional recitation that “each of the panels is appropriately sized and shaped to load all of the lapped seams predominately in shearing stress when the storage volume contains a liquid” is considered to be met.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi.

Takeuchi discloses the claimed invention except for one of the panels including a cutout and attached to a manway having a removable cover. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bag of Takeuchi with a cutout attached to a manway having a removable cover since it was known in the art that cutouts attached to a manway in bulk storage bags permits easy access to the interior of the storage bag.

Allowable Subject Matter

8. Claims 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims

"define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
